```
/* Freek Keijzer, myBrand, 28.01.2021
View to obtain maximum result from data giving relation
between SAP user-id and name of a person. Source tables:
USR21 - "User Name/Address Key Assignment"
ADRP  - "Persons (Business Address Services)"
Relation between SAP-id (usr21.bname) and name (adrp.name_text).
Standard views like V_USERNAME and USER_ADDRP do something
comparable on same tables, but these views include filters.
